ABOUT US

RUJZ DESIGN GALVANIC COATINGS

Rujz Design galvanization plant started by obtaining an existing galvanization line from its previous, closed down owner.

Renovated and adapted for its **speciality aluminium galvanization**, as well as steel, inox, and brass galvanization coatings.

The company is specialized in **decorative component coatings**, visible parts of products requiring high attention to detail throughout the galvanizing process.

The galvanic surface treatment is a great way to increase the visual appeal of any part as well as protect it from corrosion, wear and tear.

The philosophy of Rujz Design Galvanic is based on adaptability to client's needs and requirements. **Flexible** with the deadlines and capability of responding to urgent requirements of clients.

Consistent quality is delivered on the finishes throughout the time. and orders.

rd Galvanic Coatings offers additionally an in-house **robotic polishing service**.
