

# Gola profiles

A refined aesthetic is key in modern kitchens. Gola profiles create a clean, handle-free look while maintaining full functionality. The continuous surface not only enhances visual appeal but also simplifies cleaning and everyday use.

Our Gola profile brochure presents a complete overview of the available systems, configurations, and design possibilities within the range.

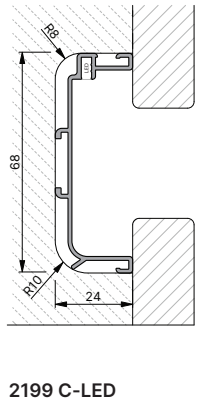

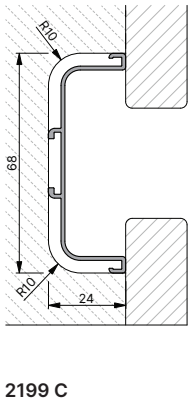

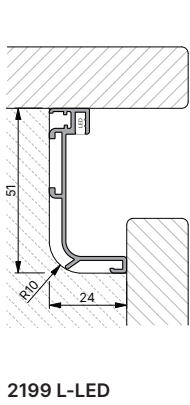

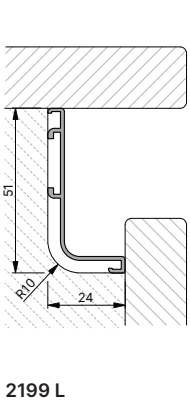

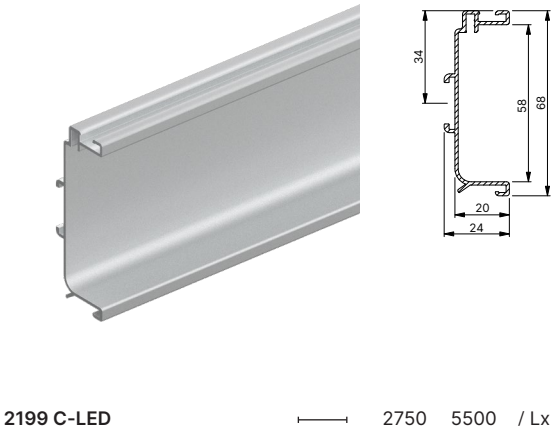

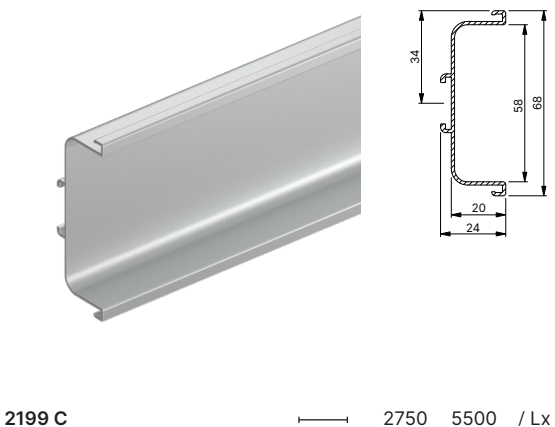

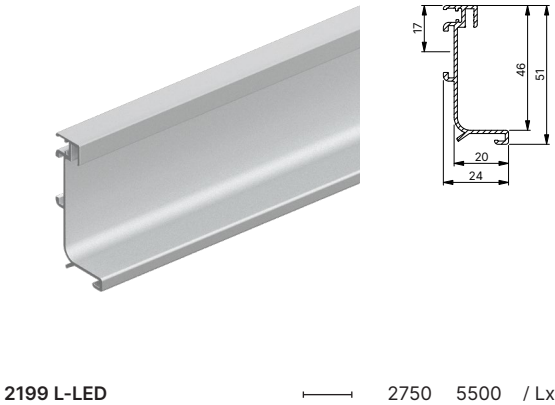

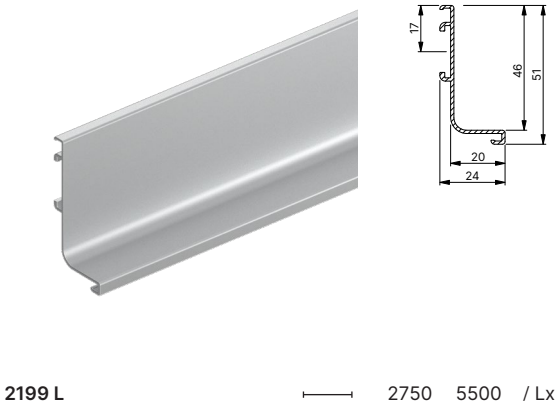

# Gola / Gola LED

Designed for seamless integration, the profiles require no drilling into cabinet fronts, allowing for maximum flexibility in both design and construction.

# Gola LED - Available LED Components

The Gola LED system combines integrated LED lighting with handle-free aluminium profiles to create functional and visually appealing furniture solutions.

A complete range of electronic components is available, including LED strips, power supplies, controllers, sensors and installation accessories, enabling customised lighting configurations for various applications.

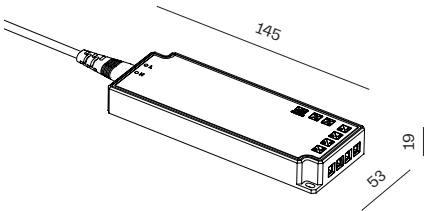

**POWER SUPPLY** convert standard AC input voltage into the low-voltage DC power required for LED operation. Available in various wattages to accommodate different installation sizes and lighting requirements.

**LED STRIPS** designed specifically for integration into Gola profiles. Available in different colour temperatures, power outputs and protection ratings, they provide both functional and ambient lighting while maintaining the clean appearance of handle-free furniture.

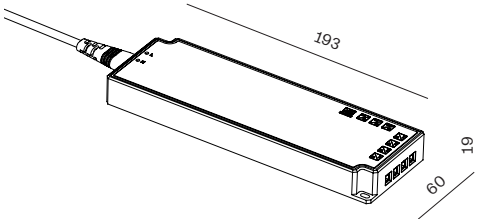

**CONTROLLERS AND SWITCHES** provide convenient management of the lighting system. Depending on the application, they enable on/off operation, dimming, colour adjustment and other lighting control functions. Available options include motion, door-opening and proximity sensors, improving both user comfort and energy efficiency.
